## Presentation

The **SMD – Data Manipulation System** is a software developed by **PRIMATA ELETRÔNICA** that is in constant evolution. It allows to manage, program and analyze, through several resources (**graphics, spreadsheets, histograms, reports**, etc.), all the information that is collected by our equipment, in a very intelligent and intuitive way.

The **SMD** software is installed in a database that is saved on the user's computer, allowing the user to quickly connect to the equipment via USB port. It is supplied **free of charge** with our Analyzers and Loggers.

## Applications

**SMD – Data Manipulation System** is a computer application program that allows the user to program data acquisitions, as well as recover and analyze the data recorded by **any of our models** of Analyzers and Loggers.

The data is displayed through graphics and can be printed or saved in files. The **SMD** also allows exporting the data to other applications (spreadsheets, etc.) and also to generate reports (according to **ANEEL standards**), in addition to having a friendly interface and being easy to install.

## System Requirements

To install and run the **SMD – Data Manipulation System**, it is advisable to have the following minimum features on your computer:

- ✓ Windows XP operating system or superior;
- ✓ 50 MB of free disk space;
- ✓ 4 GB of RAM;
- ✓ Microsoft Excel;
- ✓ PDF printer;
- ✓ USB port to connect the Analyzer or Logger to the computer.
